ANALYTICA

About Us

Analytica is an award-winning consulting and technology services provider that supports public-sector civilian, national security, and health missions. We specialize in data-driven solutions, which have been recognized by organizations such as NYU's Governance Lab for driving public sector modernization and innovation. Analytica is an SBA Certified 8(a), HUBZone that has been honored as one of the 250 fastest-growing businesses in the U.S. for three consecutive years by *Inc.*

Industry Leading Experts

From Data Scientists to SAFe-Agilists, Analytica has built a team of exceptionally dedicated analysts, statisticians, developers, engineers, and professionals with a wide range of expertise and critical industry certifications.

Our experts have demonstrated experience using open source programming languages and software including R, Python, Java, Scala, Mongo DB, Cassandra, MySQL, and Postgres SQL.

Technology Agnostic Service Provider

We believe in being an objective partner that collaborates with customers, so they can leverage our expertise to provide customized solutions using the best technologies for their organizations.

Our experience includes using open source tools and platforms as well as industry-leading data management and analytics software, such as:

- ▶ Tableau
- ▶ Qlik
- ▶ SAS
- ▶ SAP HANA
- ▶ Hortonworks/Cloudera
- ▶ Teradata
- ▶ Databricks
- ▶ Oracle
- ▶ Informatica
- ▶ MicroStrategy
- ▶ IBM/Cognos

Our corporate partnerships also include AWS, Azure and Google Cloud Platform.

Information & Data Management

Applying technologies and streamlining processes to enable you to capture, manage, store and deliver information accurately and responsibly. Our services include:

- Data Warehousing
- Master Data Management
- Cloud and Big Data Architecture
- Data Modeling and Management
- Blockchain Development
- Content Management Systems
- Customer Relationship Management
- Storage and backup administration

Analytics & Visualization

Simplifying decision making by presenting complex data in a visually interactive manner, making it easy to recognize patterns and find exceptions. Our services include:

- Data Science
- Predictive Analytics
- Business Intelligence Solutions
- Statistical Modeling & Validation
- AI/ Machine Learning
- Dashboarding and Reporting
- Program Integrity Support
- Natural Language Processing & Analytics

Software & Systems Engineering

Supporting a full range of lifecycle services to help your organization develop, manage, and maintain your IT systems environment. Our services include:

- DevOps and DevSecOps
- Enterprise Architecture
- Agile Product Development
- Open Source Development
- Rapid Prototyping
- Systems Engineering
- Systems Integration
- Data-Driven Systems Engineering

Management Consulting

Program management and governance expertise to address your immediate and future business and technology problems. Our services include:

- Change Management
- Human Centered Design
- Mission Support Services
- Business Process Management
- Business Transformation Services
- Human Capital Services
- Performance Management
- Data Governance

Sample Projects

BI Tool Development

Analytica provides data warehouse architecture, design, and development supporting inputs from numerous CMS data sources and complex big data sets as well as ETL/Metadata development and support. Our personnel have also provided CMS with architecture and development support for leading BI and Visualization platforms to include IBM Cognos Analytics 11, Tableau, MicroStrategy, and Qlik.

Metadata Support

Analytica provides metadata management, governance workflow, and metadata publishing for each data attribute within the 52 institutional databases of the 6 PB compliance data warehouse (CDW). Our services include creating, developing, migrating, cleansing, and reviewing metadata for accuracy. These metadata definitions are then published to the CDW Portal Data Dictionary which provides consumers the ability to navigate an immense volume of data, data sources, and data attributes.

Cloud-Based Dashboard Support

Analytica is developing a dashboard prototype for a single, enterprise-wide system for immigration records. Our solution incorporates machine learning, AI, SAS, data matching methodologies and other open source techniques and tools. We use advanced methods/protocols, testing strategies, and work products (i.e., rulesets, algorithms) for 1) matching immigration data to a unique person across multiple DHS immigration data systems (Person Centric Data Matching), 2) creating a unique record identifier for each person-based record using a Government-approved encrypting and decryption algorithm, 3) maintaining a secure crosswalk file that is used with each data update to verify and validate existing persons and add new entrants, and 4) developing a reporting dashboard and customizable reports and visualizations.

Data Science Support

Analytica provides critical data science, machine learning, artificial intelligence, big data and analytics support for SEC. Our support includes developing machine learning models to improve the detection of insider trading and financial fraud; processing data sets using modern econometrics methods, statistical modeling techniques, and graphical analysis to analyze and interpret statistical data; updating existing programs to reflect newly implemented business rules and/or policy changes; and developing customizable reports.

Application Management Support

Analytica provides project management, application architecture, software engineering, database support, and system integration for the modernization of the DHA Joint Pathology Information Management System (JPIMS) – the world's largest repository of pathology specimens. Our services include developing, enhancing and providing functional and technical development support, database maintenance, and quality assurance/test management for the web-based application.

Capability Statement

Chi-Chack is a proven 8(a) provider of professional services, primarily customized training and education.

Our Services

Training & Education
- Professional Education Services
- Mission Readiness Support
- Classroom, online and mobile training

Operational Support
- Program Management
- Administrative Support
